Manju Bhati

Senior Software Test Engineer | Manual Testing
Greater Noida, India | +91 95486 32106 | manjubhati0071@gmail.com

PROFESSIONAL SUMMARY

Senior Software Test Engineer with 6 years of experience in manual testing of web, mobile, Windows-based and client-server applications. Experienced in requirement analysis, test scenario and test case design, functional, regression, smoke, sanity, integration, compatibility, exploratory and user acceptance testing. Hands-on experience with API testing using Postman, backend data validation using SQL and MySQL, defect lifecycle management in Jira, and release validation in Agile and Scrum environments.

CORE SKILLS

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, Re-testing, Exploratory Testing, User Acceptance Testing (UAT)
Test Design: Requirement Analysis, Test Scenarios, Test Cases, Test Data, Traceability, Test Summary Reports
API & Database Testing: Postman, REST APIs, SQL, MySQL Validation
Application Testing: Web, Mobile, Windows-based, Client-server, UI Testing, Cross-browser Compatibility Testing
Defect Management: Defect Identification, Reporting, Prioritization, Triage, Verification and Closure using Jira
Delivery Practices: SDLC, STLC, Agile, Scrum, QA and UAT Environments, Release and Production Validation
Documentation: Microsoft Excel, Google Sheets, Test Execution Evidence and Status Reporting

PROFESSIONAL EXPERIENCE

Senior Software Test Engineer | Airtel Africa via Pineswift Technologies **Sep 2024 - Present**

- Validate Airtel Money features and end-to-end business workflows across QA and UAT environments for multiple African markets.
- Analyze business and functional requirements and prepare test scenarios, detailed test cases, test data and execution evidence.
- Execute functional, regression, smoke, sanity, integration and exploratory testing for web and backend-supported workflows.
- Test REST APIs using Postman and validate request parameters, authentication, response data and application behaviour.
- Use SQL queries to verify backend data, investigate mismatches and confirm application behaviour across business workflows.
- Log and track defects in Jira, reproduce issues, support defect triage, verify fixes and complete regression testing before releases.
- Collaborate with developers, product owners and QA team members during sprint planning, daily stand-ups, reviews and retrospectives.

QA Engineer | Crocus Robotics Pvt. Ltd. **Sep 2020 - Aug 2024**

- Performed end-to-end manual testing for healthcare and financial-services applications across web and mobile platforms.
- Reviewed functional documents and use cases to create test scenarios, test cases, test data and test summary reports.
- Executed UI, functional, smoke, sanity, regression, re-testing and cross-browser compatibility testing on Chrome, Firefox and Safari.
- Tested APIs using Postman and validated application data using SQL and MySQL queries.
- Reported defects in Jira with clear reproduction steps and evidence, verified fixes and monitored issues through closure.
- Participated in weekly client discussions to clarify requirements, share test status and support release readiness.

SELECTED PROJECTS

Airtel Money - Digital financial-services platform supporting business workflows across multiple African markets.
- Tested new features and business workflows in QA and UAT, including API responses, backend data and user-facing behaviour.
- Performed regression and release validation, documented defects and verified fixes with development teams.

We Care Health Solution - Web application used by hospital staff to manage current, scheduled and completed patient-service bookings.
- Validated booking and case-management workflows through functional, UI, mobile, compatibility and regression testing.
- Prepared and executed test cases from functional requirements and recorded test results and defects.

Personal Loan, Credit Card and Credit Report Platform - Online financial-services platform supporting loan, credit-card, credit-report and verification workflows.
- Tested customer journeys and workflows using functional, regression, integration and compatibility testing.
- Validated UI behaviour, APIs and database records and supported defect triage and re-testing.
